Date: Nov. 10, 2025

Subject: Notice of Delivery Postponement – 60 Days (Equipment Failure)
Reference: Proforma Invoice (PI) No. ANDRES16052025, Order No. PO16052025

Dear Ing. Andrés Sebastián Carrillo Albuja,

This letter formally informs you that due to an unexpected critical equipment failure at our facility, delivery of the aforementioned order will be delayed by sixty (60) days.

Root Cause (Technical Summary):

On Nov. 10 2025, our machine in production line experienced a failure in the subsystem, resulting in an immediate stop of the process step SMT placement.

The failure requires spare parts and vendor servicing to restore the line to qualified operating conditions.

Corrective Actions and Mitigation Plan:

Containment: Production lots were isolated; no non-conforming items will be released.

Repair & Parts: Replacement parts have been ordered; Original factory repair service has been scheduled for Nov.15, 2025.

Re-qualification: After repair, we will run process re-qualification (OQ/PQ) and perform full QA on first-off samples (visual, ICT/functional, burn-in as applicable) to verify conformity.

Recovery: We will prioritize your order in the production queue and consider overtime/shifts to compress the timeline where possible.

Revised Schedule:

Original delivery: Nov. 15, 2025

New estimated delivery date Jan. 15, 2026 (60-day postponement)

We sincerely regret the inconvenience and appreciate your understanding while we ensure product quality and reliability. We remain fully committed to meeting the technical specifications and contractual requirements of the project.

Should you need additional documentation to support your contract extension request (e.g., service reports, failure analysis summary, or revised Gantt), we will provide it promptly.

Sincerely,
Cecelia Wang
Senior Sales
